

Gemengde breuk schrijven

Wanneer de teller groter is dan de noemer bij een breuk dan heb je meer dan 1 hele. Haal alle helen uit de breuk en schrijf de gemengde breuk.

Voorbeeld: Als 1 pizza bestaat uit 6 punten (noemer) en je hebt 13 punten (teller) hoe veel hele pizza's heb je dan en welk deel hou je dan nog over? $\frac{13}{6} = 2 \frac{1}{6}$

$$\frac{13}{6} = \text{ — }$$

$$\frac{10}{6} = \text{ — }$$

$$\frac{17}{6} = \text{ — }$$

$$\frac{29}{6} = \text{ — }$$

$$\frac{13}{6} = \text{ — }$$

$$\frac{13}{5} = \text{ — }$$

$$\frac{7}{5} = \text{ — }$$

$$\frac{21}{5} = \text{ — }$$

$$\frac{18}{5} = \text{ — }$$

$$\frac{33}{5} = \text{ — }$$

$$\frac{13}{9} = \text{ — }$$

$$\frac{17}{9} = \text{ — }$$

$$\frac{29}{9} = \text{ — }$$

$$\frac{40}{9} = \text{ — }$$

$$\frac{10}{9} = \text{ — }$$

$$\frac{13}{3} = \text{ — }$$

$$\frac{5}{3} = \text{ — }$$

$$\frac{11}{3} = \text{ — }$$

$$\frac{22}{3} = \text{ — }$$

$$\frac{17}{3} = \text{ — }$$

$$\frac{13}{10} = \text{ — }$$

$$\frac{33}{10} = \text{ — }$$

$$\frac{42}{10} = \text{ — }$$

$$\frac{59}{10} = \text{ — }$$

$$\frac{71}{10} = \text{ — }$$

$$\frac{13}{2} = \text{ — }$$

$$\frac{13}{3} = \text{ — }$$

$$\frac{13}{4} = \text{ — }$$

$$\frac{13}{5} = \text{ — }$$

$$\frac{13}{6} = \text{ — }$$

$$\frac{13}{7} = \text{ — }$$

$$\frac{13}{8} = \text{ — }$$

$$\frac{13}{9} = \text{ — }$$

$$\frac{13}{10} = \text{ — }$$

$$\frac{13}{11} = \text{ — }$$
