

The Easter Egg Hunt

It was nine o'clock in the morning on Easter Sunday. Elspeth had three

friends at her house. They were over for an Easter egg hunt. Elspeth's mum told the children there were twelve eggs altogether, hidden in the garden. The children ran into the garden. They were excited and happy! Zac found the first egg very quickly - it was under the rose bush. Melanie found the second one

- it was behind a flower pot. Elspeth found the third egg - it was on the garden fence. After twenty minutes, the children had found eleven eggs - one was missing. They looked all over for the twelfth egg, but they did not find it. Finally, they gave up and they went into the kitchen. They saw Elspeth's dad. He was reading the newspaper. There was a half-eaten Easter egg on the table beside his coffee and he was eating chocolate. The mystery of the twelfth egg was solved!

True or false?

- 1, It was Sunday afternoon. t/f
2. Some friends were staying at Elspeth's. t/f
3. Elspeth's mum h thirteen eggs. t/f
4. Zac found the last egg. t/f
5. There was an egg in front of the flower pot. t/f
6. One egg was missing. t/f
6. Eventually, the children went into the kitchen. t/f
7. Elspeth's dad ate the twelfth Easter egg. t/f

- What happened to the last egg?
- Who stole the last egg?
